

Product Liability

PRODUCT LIABILITY INSURANCE covers businesses against potentially catastrophic product-related events:

- Compensation awarded as a result of damage to property or personal injury caused by your product.
- Unforeseen circumstances, such as product faults your quality control system couldn't trace.

Please note that if you simply make an inferior product, you may be unable to make a claim, or even receive insurance coverage. Bad workmanship is not covered either.

Before issuing a policy your insurer will want to know the following:

- Manufacturing or services are conducted according to industry best practice
- Staff are adequately trained
- Equipment and systems are appropriate, up to date and well maintained
